## COMPANY INTRODUCTION

NINGBO HOPSON CHEMICAL INDUSTRY CO., LTD is specialized in manufacturing cyanoacrylate adhesive, PVC cement and automotive interior adhesive. HOPSON expert team work closely with every customer to pursue the common goal that we provide our valued clients with premium personalized bonding solution.

With top analysis & test device, HOPSON professional chemical engineers have been doing continuous research & development to ensure the products are of good performance. From raw material inspection, production process control, quality testing, packaging through to shipping, each step will be strictly controlled. Besides, we grow with customers together and we want to contribute to the growth by constantly exceeding expectations, always adding values, and most importantly - never making excuses.

HOPSON is committed to supplying environmental friendly superior adhesives no matter from the production process or application in use, environment protection and customer care are our first principle. HOPSON branded products are exported globally with a good reputation among our customers worldwide. Currently, we have agents in Europe, America, South Korea, Russia and Southeast Asian countries.

Environment Friendly Adhesive Manufactory

# PRODUCTION WORKSHOP

Hopson Chemical is a leading professional manufacturer of adhesives and sealants, plastic vessels, which has been always dedicated to the research and development of various functions and applications in adhesives for the past 12 years.

# HOME&OFFICE ADHESIVES SUPER GLUE

hopson® 

1.1 SUPER GLUE Aluminum Tube Series

HOPSON super glue is a single-component cyanoacrylate monomer in the liquid state capable of extremely rapid polymerization between adherent surfaces, resulting in extremely strong and structural bonds at room temperature.

HOPSON super glue products are suitable for mending dishes and household articles, furniture, fishing tackle and other sports equipment, car fixtures, electronic instruments, stone sculpture, or using on metal, leather or paper.

Application

- Be sure the surfaces to be glued are clean and dry.
- Apply one drop for each 3cm<sup>2</sup> area. Apply with extreme care. Never spread with fingers.
- Apply to only one for the surface. Quickly place two surfaces together with slight finger pressure. Bond completed is seconds.

1.3

Power Tack

1.HOPSON POWER TACK

**HOPSON** power tack - the clever alternative to pins, tape and thumbtacks!  
**HOPSON** power tack is a reposition, reusable for quick, clean bonding. It will attach small objects to virtually all surfaces, e.g. walls, furniture and window. It has thousands of uses all around the home, school and office.  
Stick posters, seal around windows or doors, clean dust and hair from clothing, keep pictures frames straight. Use **HOPSON** power tack no non-porous surfaces, painted surfaced, vinyl coated wall paper, glass, metal etc. Ensure they are clean, dry, free from grease and loose materials. Take care when removing after a period of months. Do not use for heavy objects. Recommendations are a guide only.

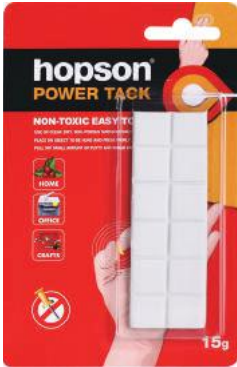

Application

- Pull off small pcs.
- Knead until soft.
- Apply to the item to be fixed.
- Pressing firmly to the surface.

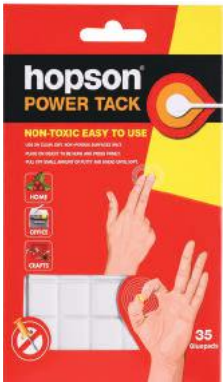

POWER TACK

G.W.	15kgs
CTN	38.5*22.5*24.5cm

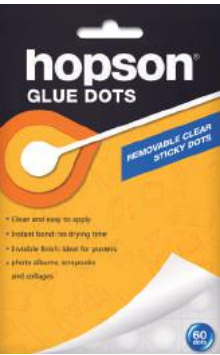

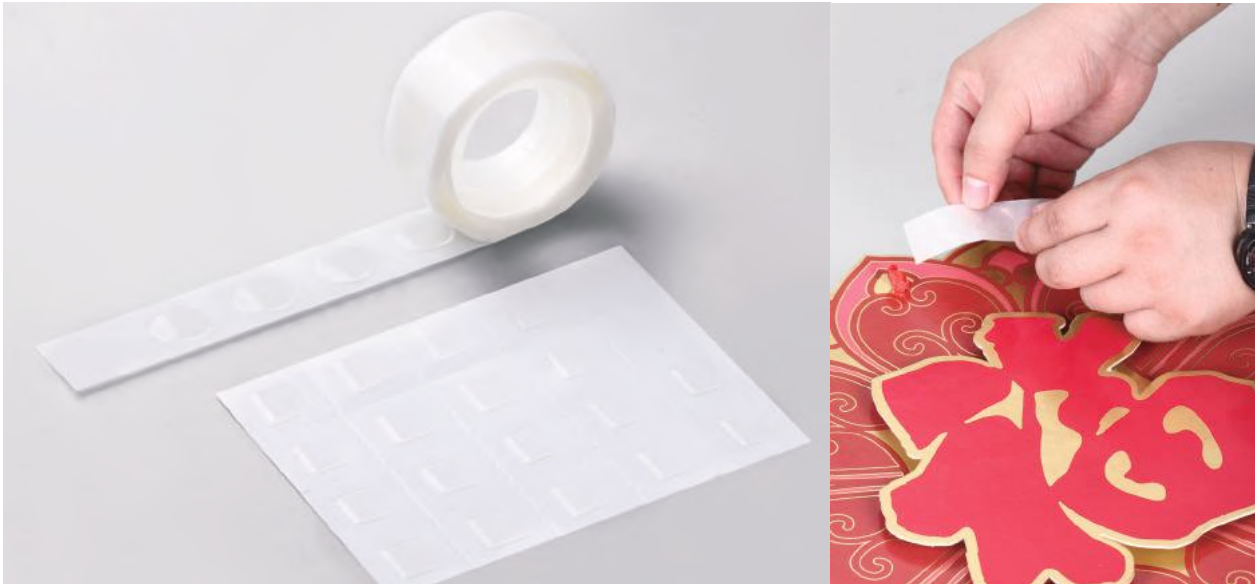

2.HOPSON GLUE DOTS

**HOPSON** Glue dots are pressure-sensitive adhesive dots, used in various different applications, such as sticking credit cards to paper, arts and crafts, and as a safe adhesive for children to use, without needing a hot glue gun. Glue dots are globules of adhesive, which allow attachments to float above a page. They provide a clean and instant bond and are often a more suitable solution than hot or liquid glues or adhesive tapes.

**HOPSON** Glue dots leave much less mess, residue, and odor which help present a product in the best way, whilst increasing productivity and reducing costs. Removable glue dots also allow you to create a bond which can be removed when needed.

Application

- Point of purchase display assembly
  - Adhering matting in picture frames
  - Sealing and resealing food & beverage cartons
  - Building (gluing) pocket/presentation Folders
  - Make a non-adhesive product, adhesive
- Assembling sample books
  - Securing items prior to shrink wrapping
  - Sign and display manufacturing
  - Securing items within clamshells
  - Joining sheeting, films, liners, papers, etc.

PAPER DOTS

1.4

Paper Glue

1.HOPSON GLUE STICK

**HOPSON** glue sticks Featuring a super-strong formula that quickly sets a strong, permanent bond, they're the perfect all-purpose glue sticks for craft projects.

**HOPSON** glue adheres to a wide variety of craft materials including paper, wood, fabric and foam board. The ideal scrapbooking glue, it applies and dries clear and features a washable, acid free and non-toxic formula.

Application

They can be used for craft and design, office use and school. There are now varieties that are permanent, washable, acid-free, non-toxic, solvent free, and dyed (e.g. to see where the glue is being applied easier) varieties. These are most commonly used today.

2.WHITE GLUE

White glue is an aliphatic rubbery synthetic polymer with the formula (C4H6O2)<sub>n</sub>. It belongs to the polyvinyl esters family, with the general formula -[RCOOCHCH<sub>2</sub>]-. It is a type of thermoplastic. As an emulsion in water, PVAc emulsions are used as adhesives for porous materials, particularly for wood, paper, and cloth, and as a consolidant for porous building stone, in particular sandstone.

Application

- Ideal for arts, crafts, and school projects like envelope adhesive, wallpaper adhesive
- Suitable for craftboard ,wood ,fiber etc.
- Suitble for children over three years old
- Applicable for home school office

1.5 Epoxy Adhesive

**HOPSON** Two-part adhesive based on epoxy resins. Transparent resin and hardener. For bonding metals, crockery, glass, wood, china, crystal, pearls, ivory, precious stones and various plastics, such as polyester, bakelite, formica, rigid polystyrene and plexiglass.

**HOPSON** Clear Epoxy Syringe. The one time use syringe makes it simple to dispense and mix without making a mess, is easy to use and bonds to almost any surface. This Clear Epoxy Syringe is one of many top quality items in our Epoxy Adhesives. Good at frost, moisture and chemicals resistance.

Application

- Clean and dry the surfaces to be bonded. For smooth surface, you'd better to sand grind it first.
- Squeeze out equal volume of adhesive liquid and solidification agent, then mix them evenly with blending board and use immediately.
- Apply the blended adhesive on the surfaces of material or appliance to be bonded and mended. It can be solidified in five minutes after the surface is bonded together at room temperature. The things bonded may be used in three hours.

1.6 All Purpose Glue

**HOPSON** all purpose glue with bond formed is elastic, thus can absorb material tensions waterproof and resistant to have heat diluted, acids and alkalis.

Application

- Surfaces to be glued must be dry clean and free from grease.
- Apply adhesive evenly into both surfaces to be bonded.
- Wait for about 10 to 15 minutes until the adhesive feels dry. Firmly paste both surfaces together. The strength of bond is determined by the amount of pressure applied, but not by the bonding duration.

SHOE ADHESIVE

1.8 Silicone Sealant

**HOPSON** RTV Silicone Sealant is a single component, low modulus, acetic (neutral) cure and high performance silicone sealant. It won't shrink and crack and withstands harsh temperature and aging. It is ideal for window and door frames and siding and plumbing fixtures.

Feature

- Excellent conglutination for glass material
- Short hardening time
- Good performance of cold, heat and weather resistance
- Does not easily yellow

NO.2001 SILICONE SEALANT

2.1 NAIL GLUE SERIES

**HOPSON** Nail Glue is without hydroquinone, and contents of chlorine is less than 100ppm. It's all approved by with the European and USA cosmetic standard. With the high bonding performance, quick setting and long lasting. It won't damage the nail.

Feature

- Adheres to nails & nail tips in seconds.
- Quick setting and long lasting.
- Great for sealing silk wraps.
- No Hydroquinone ingredient which is not allow in Europe.

Application

- Remove polish and clean nails thoroughly.
- Apply one drop of glue to split or broken nails or nail tip and hold the break or tip together with gentle pressure for 10-15seconds.
- Let dry and smooth nails with a file or buffer.
- After each use, wipe applicator tip and replace cap tightly.

HIGH PERFORMANCE  
INDUSTRY ADHESIVES

3.1 High Performance Industry Adhesive

**HOPSON** High Performance Industry adhesive have excellent bonding strength and fast curing speed with many substrates, including rubbers, plastic, ceramics, wood, metal, leather, fabric, paper, cork and so on. When it used together with primer of H770, it can be also have excellently bonding with PP, PE, AB, Nylon and so on.

Also perform well on dry or porous materials, thereby extending the range of application possibilities.

Feature

- Cure in seconds
- Single component, convenient to use
- High bonding strength, Low odor, low blooming
- Impact and temperature resistance and long shelf life
- Wide temperature range from - 50 to 120°C
- Ideal for high speed production . Automatic dispensing equipment readily available.
- Cost effective. Only minimal amounts of adhesives are needed to form strong bonds.

Item No.	Viscosity (cps)	Cure Time Steel-steel (secs)	Temperature Range.( °C)	Gap Fill (mm)	Shear Strength (kgf/cm2)
H201	80 -120	<15	-55 to +82	0.08	160 -180

Cute time, ASTM D 1002/ EN 1465, Tensile Shear Strength, DIN 53288 Testing at 25 °C and 50% relative humidity.

NO.3101  
SURFACE INSENSITIVE

Item No.	H201
80-120cps, medium viscosity, general purpose, surface-insensitive adhesive, Ideal for acidic surfaces, such as wood, rubber, leather materials.	

NO.3102  
LOW BLOOMING

Item No.	H206
30-50cps, low blooming, low viscosity, fast setting time. Excellent for splicing O-Rings, rubber materials, and rubber bonding metals.	

NO.3103  
FOR PLASTIC AND RUBBER

Item No.	H295
80-100cps, medium viscosity. Ideal for bonding most kind of plastics, and plastic bonding rubber.	

NO.3104  
FOR METALS

Item No.	H215
30-50cps, low viscosity, fast setting, impact resistant, high temperature resistant for 120°C. Ideal for bonding metals .	

NO.3105  
GEL FOR POROUS MATERIAL

Item No.	H254
Gel, non-flowing , high bonding strength. Ideal for vertical surface application and porous materials.	

NO.3106  
FOR FLEXIBLE MATERIALS

Item No.	H298
80-100cps, medium viscosity, fast setting, flexible. Ideal for leathers, rubber and plastics.	

NO.3107  
LOW ODOR LOW BLOOMING

Item No.	H260
30-50cps, low viscosity, low odor, low blooming. Ideal for electronic instruments, phones and cosmetic products.	

NO.3108  
BLACK/RUBBER TOUGHENED

Item No.	H280
300-500cps, black, medium viscosity, low blooming, rubber toughening, impact resistant. Ideal for rubber parts, black plastics and electronic instrument.

Item No.	H770
----------	------

HOPSON H770 is solvent-based PE, PP primer, can improve difficult to bond surfaces, such as PE, PP, Silicone Rubber, TPR, EPDM. It is suitable to bond with HOPSON cyanoacrylate adhesive.

NO.3202  
ACTIVATOR

Item No.	H712
----------	------

HOPSON H712 is solvent-based activator for accelerating cyanoacrylate adhesive curing velocity. Adhesives achieving immediate contact. Suitable for working in unfavourable conditions of temperature and humidity. Suitable for highly porous materials.

NO.3203  
BONDING REMOVER

Item No.	H790
----------	------

HOPSON Cleaner remove cured cyanoacrylate adhesive from skin, products, or assembly tool. H790 won't etch most plastics or paints, it's better to test a small area before using. Low odor, low corrosion.

NO.3204  
ACCELERATOR FOR  
MDF SPRAY

Item No.	H715
----------	------

ACTIVATOR H715 is a single component CFC-free solvent based surface activator. The activator is designed to promote the speed of cure of HOPSON cyanoacrylate adhesive. It used for furniture of MDF kit.

3.2 HOPSON Bulk Cyanoacrylate

HOPSON Cyanoacrylate offered bulk packing by 20kg, 25kg and 1 tons . Our standard cyanoacrylate monomer is a high-quality, 100% purity. We also offer European Standard grade which approves by Rohs and REACH certificate . We can offer customized grade cyano with special curing time, viscosity & bonding strength to meet your strictly requirements .

All adhesives leaving our facilities have been through our intensive quality control system. Each batch has been thoroughly tested to meet the highest standards.

Feature:

General Purpose / Woodwork, plastic, rubber and especially for acidic woods

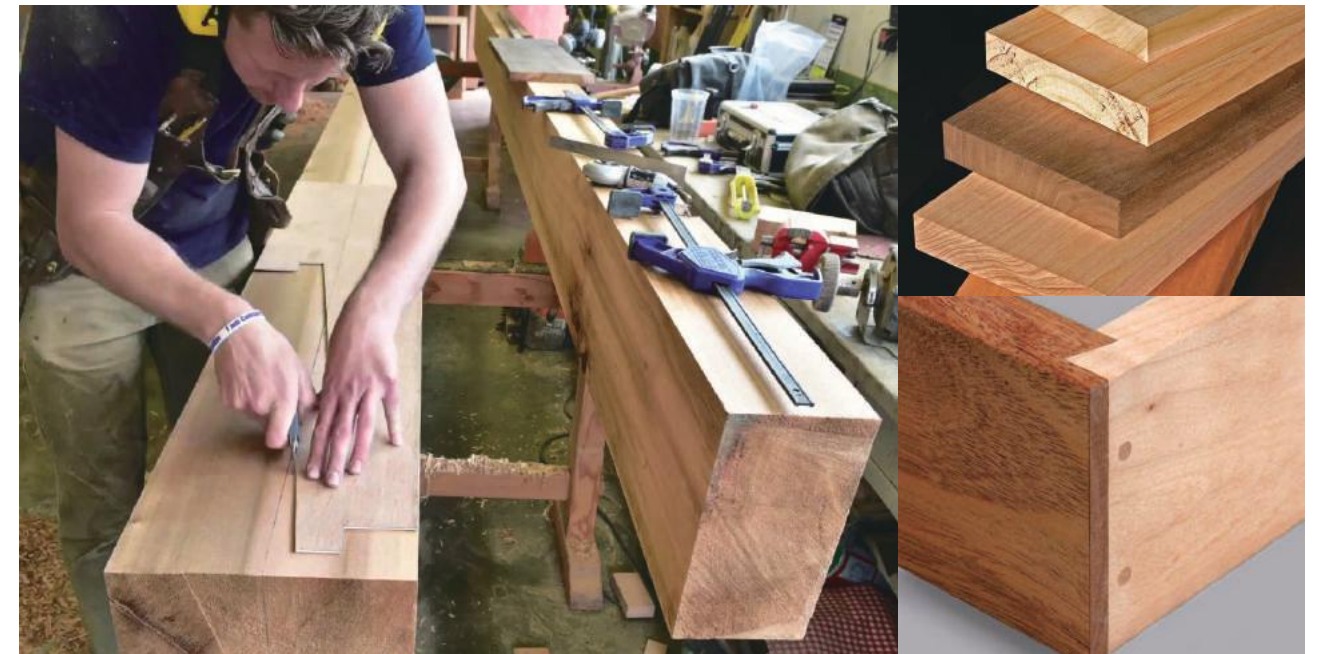

Grade	Chemical Type	Viscosity (CPS)	Gap Fill (mm)	Cure time (Sec.)	Shelf Life (Month)	Tensile-Shear Strength (kgf/cm2)
H 105	ETHYL	2-3	0.04	3-5	6	120~160
H 106	ETHYL	2-3	0.04	5-8	8	140~180
H 108	ETHYL	2-3	0.04	10-12	12	140~180
H 109	ETHYL	8-10	0.05	10-15	12	140~180
HV-50	ETHYL	40-60	0.06	10-15	12	140~180
HV-100	ETHYL	100	0.10	15	12	140~180
HV-300	ETHYL	300	0.15	15	12	140~180
HV-1500	ETHYL	1500	0.20	15	12	150~200
HV-GEL	ETHYL	GEL	1	30	12	180~220

Cute time, ASTM D 1002/ EN 1465, Tensile Shear Strength, DIN 53288. Testing at 25 °C and 50% relative humidity.

### 3.3 Specialized Industry Adhesive

## 1. Woodworking Cyano

**W-20**  
**FOR WOOD REPAIR**

Fast Grade, 3 second, 100% Purity,  
High Bonding Strength, No yellow  
change on wood.

**W-50**  
**FOR HARD WOOD BONDING**

FOR HARD WOOD BONDING.  
Fast Grade, Extra Bonding Strength,  
100% Purity.

**W-1500**  
**FOR FURNITURE AND MDF KIT**

With accelerator H715, it is easy to use, fast bonding speed and high Bonding strength.

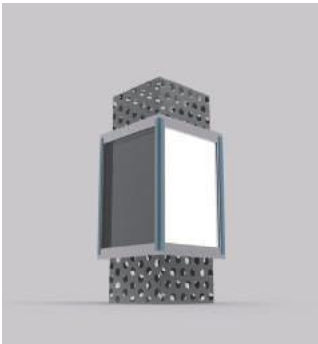

2.Flex Banner Adhesive

F-20

Suitable for bonding flex banners, and flex banner bonding metals. It is fast setting time, easy application and high bonding strength.

3.Hardware Specialized Adhesive

H-20

Hardware Specialized Adhesive is a kind of high-performance instant adhesive specially for the die industry, and metals bonding. With fast setting time, high strength, high temperature resistance, long shelf life.

4.Magnet Specialized Adheisve

M-20

HOPSON magnet adhesive is a kind of high performance instant adhesive specially used for cutting magnetic materials. Vibration resistance, water resistance, and with long shelf life.

5.Shoe & Leather Specialized Adhesive

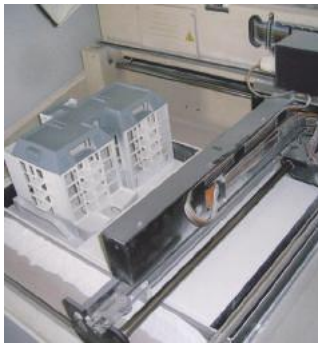

S-20

Ultra-soft, non-brittle, fast setting time, high bonding strength. It's specialized for bonding soft materials such as leather, rubber, and shoes.

6.Low Odor 3D Print Adhesive

D-20

Low viscosity, low odor, low blooming, medium drying time. Specialized for infiltration 3D printing materials.

7.Electronic Specialized Adhesive

E-20

Electronic specialized adhesive is low blooming, low odor and medium setting time. It is specialized for electronic instruments and full-auto assembling system.

8.Toy Industry Adhesive.

T-20

HOPSON Toy industry adhesive is specialized for all kind of plastic toys, wood toys. With low odor, low blooming and fast setting time. It can pass all kind of Rohs testing.

9.Medical Device Specialized Adhesive

ME-20

Low viscosity, flexible, impact resistance, specialized for medical device bonding. Such as medical plastics and metals. ISO-10993 certificated.

10.Customized Adhesive

Customization can be made to meet the needs of bonding materials in different industries, such as plastics, rubber, electronics and medical treatment.

4

PVC CEMENT

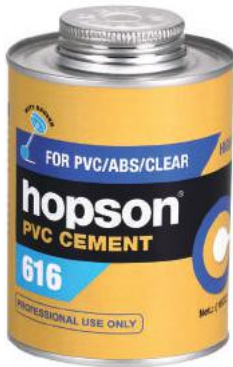

**HOPSON** PVC Cement is mono-component solvent glue with vinyl polymer as main material and is special adhesive for bonding hard PVC. It can also be used for self-bonding and mutual bonding of materials such as ABS, AS, polystyrene, organic glass and polycarbonate. It's used for PVC, UPVC, CPVC pipes, for Cold and Hot Water Systems. It's fitting with advantage of easily spread, quick dry, anti-corrupt, anti-hot water and high strengthen, etc.

Usage

It is applied uniformly on single side or double side of bonding surface that is dry and without oil for immediate bonding and close contact. It is not allowed to glue after drying. Location can be fixed in 5 minutes and certain levels of strength can be achieved in 2-3 hours and maximum strength can be reached in 24 hours.

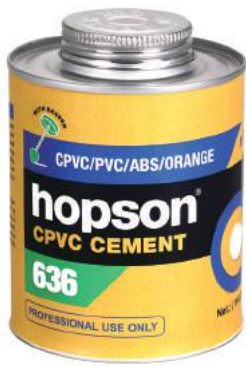

Notes:

This item is flammable and should be kept in cool and ventilating area and must be stored andt ransported according to the rules for flammable articles. When in use, attention must be paid to ventilation and prevention of contact with fire.

PVC CEMENT

Item No.	HPV-616
Packing	118ml/473ml , 4oz/16oz 48tins/ctn, 24tins/ctn.
G.W.	2.3kgs/13.5kgs
CTN	34.5*23*17.7cm/ 35.5*26.5*25.5cm

CPVC CEMENT

Item No.	HPV-636
Packing	118ml/473ml , 4oz/16oz 48tins/ctn, 24tins/ctn.
G.W.	2.3kgs/13.5kgs
CTN	34.5*23*17.7cm/ 35.5*26.5*25.5cm

PVC PRIMER

Item No.	HPV-333
Packing	118ml/473ml , 4oz/16oz 48tins/ctn, 24tins/ctn.
G.W.	2.3kgs/13.5kgs
CTN	34.5*23*17.7cm/ 35.5*26.5*25.5cm

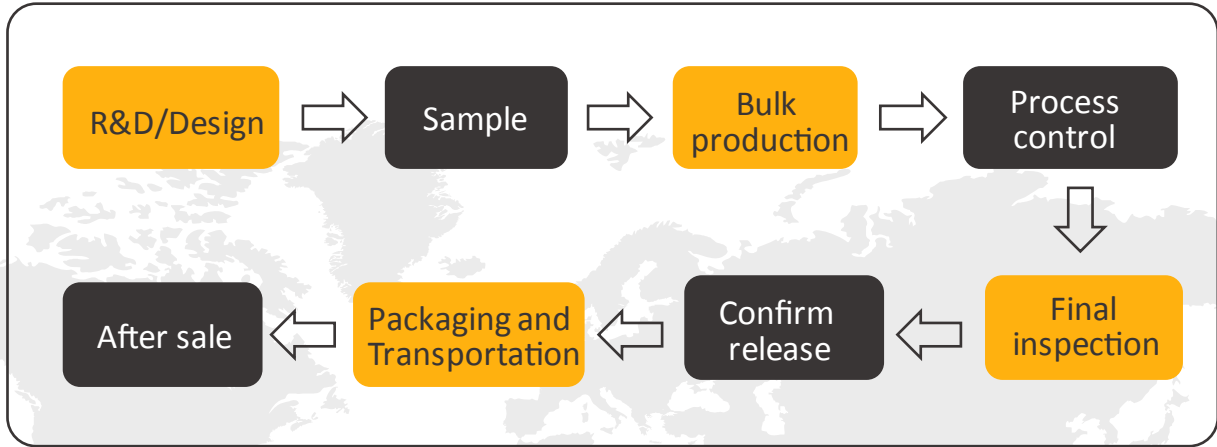

QUALITY CONTROL & FACILITY

We have our research and development team to improve our technology continuously. We use advanced inspection equipments to test the content of high molecular material, addition agent and impurity. Guarantee always best quality offered to our clients.
